21. Give three observation / suggestions to improve the overall teaching – learning experience in your institution.

Suggestions for Improvement

105 responses

Good

Yes

Nothing to improve ,, every thing is going in the systematic way.

Understand students problem

More attention should be paid to students and be should explain evey subject well to the students and when a students forget to fill out his University form they should be informe .

Very well

scholarships should be provide to bright students, lack of internships process and extracurricular activities are rare.

Thank you

Make library lacture compulsory for all

The quality of institution is good

1. Use more practical examples and activities.
2. Improve classroom environment.
3. Provide more support for skill development.

1. More practical and activity - based learning .
2. Provide digital study material and recorded lectures for students who need extra support .
3. Reduce unnecessary workload anf focus more on concept clarity and understanding.

All things are good

1. Focus on skill , 2. Technology use , 3. Infrastructure

Please hire higher education teacher, educational teacher can automatically provide knowledge to students

Teachers make inspire to students in every Field

Include more practical knowledge

A proposed idea or plan to make something better such as a product a process or performance

Teachers motivate us very well

Good teacher

All things are better .

Language improvement and friendly teachers and behaviour

Use better graphic, try to reach every student and ask for their doubts, scholarship and reduction in fees given to students

Importance of degree

Future goals

Different area knowledge

All teachers are best

Teachers behavior are also good

Use More Interactive Teaching Methods

Teachers should include activities like group discussions, quizzes, and smart-class presentations. This will make learning more interesting and help students understand concepts better.

Provide More Practical and Real-Life Examples

Lessons should be connected to real-life situations through examples, demonstrations, and practical activities. This will make learning easier and more meaningful for students.

Increase Use of Technology in Classrooms

Smart boards, videos, and digital tools should be used more often to make lessons more engaging.

Technology upgradation , give projects , use better graphics and visual media

Clear communication, yet achievement

1. Interactive learning methods
2. Use of technology
3. regular feedback and support

Excellent teaching..

Already good

Encourage teachers to use active learning strategies such as group discussions and hands-on projects to engage students and foster critical thinking.

Provide regular professional development and training for teachers to enhance their skills and stay updated with the latest teaching methodologies and technology.

Establish a robust feedback system that allows students to provide input on their learning experience and the teaching methods used.

1. Teachers should use more practical examples and activities to make the concept easier to understand.

2. More doubt clearing sessions and extra classes should be arranged for difficult subjects.
3. The institute should provide more opportunities like workshops, seminars and skill-development programs.

1.

good communication with students

teach all students say talk properly don't insulted students in front of others
do that way of teaching wch the students can enjoy the lecture and learn

Not about it ae well as very good learning

They should ask the students that they have prepared for the exam they should treat the students well and do things timely

Use more interactive teaching methods like group discussions, presentations, and digital tools to make classes engaging and easier to understand.

- Conduct regular feedback and doubt-clearing sessions so students can improve continuously and get support in difficult subjects.

- Upgrade classrooms and learning resources by adding modern labs, smart boards, and updated study materials to create a better learning environment.

1. Enhance students engagement through interactive teaching.

2. Strengthen continuous feedback mechanisms.

3. Improve access to learning resources and support services .

Noting

Need to focus on average more

First of all being more practical for the future use should be a better idea rather than just covering syllabus. and as a BCA student and the students of Bsc(IT) us having same class, same learning although we both have different exam papers in terms of difficulties, If we consider this as an academic enhancement, because my opinion is teacher should suggest some more kind of important things and topics and in more depth as BCA having harder questions. Third just develop more efficiency in every aspects cuz that is overall a crucial thing for every one..... Thank You

Interactive teaching

More practical

Strong support system

Principal is not good

Integrating technology, increasing practical learning, and providing personalized feedback.

Every thing is perfect in the Institute.

The skills improvement is very well and now I'm glad to admit this this institution

Nothing

Course increases
Study level high
Teacher increases

All well

Very good

Provide Extra classes

There is nothing to improve....All the best ways are already used to teach the students

Improve college ground,Improve classroom,improve college water

Suggestions will vary based on individual observation, but common areas for improvement include adopting interactive teaching methods, integrating more technology in the classroom, and providing personalized feedback and support to students.

Treat all students equally

More interactive sessions such as doubts classes, quizzes, and group discussions should be conducted to improve student engagement.

Regular Teacher Training Program
Promote Student-Centric Learning
Strengthen Evaluation

No

- 1) Focus on skills
- 2) Technology use
- 3) Infrastructure

- More practical , activity based learning.
- Provide digital study material and recorded lectures for students who need extra support.
- Reduse unnecessary work load and focus more on concept clarity and understanding.

Very good

*Rather than teaching just theory the logical explanation is needed to learn by students .

**Suggestion*: activities like class presentation ,class quizzes can involve more attention of students in learning .

***Before teaching a subject an introduction about the subject is important to create a base and to bring clarity of thoughts .

For example - if we talked about income tax we just don't need to know the act only but an introduction that why it was created and why it is so important for our Country and how it is structured.

Here are three meaningful and practical suggestions to improve the overall teaching–learning experience:

Suggestions for Improvement

1. Introduce more practical and activity-based learning

Encourage hands-on sessions, real-life examples, field visits, and interactive projects to help students understand concepts better.

2. Increase use of digital tools and smart classrooms

Incorporate multimedia presentations, online quizzes, educational apps, and video-based learning to make classes more engaging and updated.

3. Provide regular feedback and personalized support

Create a system for continuous feedback from students and offer mentoring sessions to help students with academic difficulties and overall growth.

Understand the students problem, not focus extra pressure study , become equally for all students

Teaching well with examples

1. Focus on skills
2. Technology use
3. Infrastructure

The teacher should not be bias

The teacher should guide students according to students interest

The teacher should never taunt a child

Practical work,

1. Assessment in practicals should be fair to everyone according their academic performance.
2. Tests should ne taken regularly .
3. Overall staff is very good. Thanks for always supporting.

Here are 3 strong and simple points:

1. Smart teaching methods like projectors, videos, and interactive activities should be used to make learning more interesting.

2. Regular doubt-clearing sessions should be organized to help students understand difficult topics.

3. More practical learning through experiments, projects, and real-life examples should be

encouraged.

Increase practical activity based learning improve communication between teachers and students

sometimes

Asking question

Set realistic goal

Test yourself regularly

More interactive classes

More practical session

Regular doubt clearing

- use better graphics and visual media to engage students.
- Try to reach every students and ask about their doubts.
- integrating practical and experimental learning.

More attention should be paid to students and be should explain every subject well to the students and when a students forgets to fill out university form they should be inform through every subject teachers

Do better in practicals

1. Establish an Active Internship & Career Development Cell
2. Introduce Commerce Seminars & Skill-Enhancing Courses for Practical Growth
3. Improve Classroom Environment for Effective Learning

Everything is good and nothing need to improve

Everything is going well but at the last of semester teachers start covering syllabus very fast which we couldn't understand properly

All good

Based on common themes for improving the teaching-learning experience, here are three suggestions:

 Suggestions for Improvement

Enhance Practical and Experiential Learning: Incorporate more hands-on activities, field visits/studies, and industry-relevant projects (like case studies, market surveys, or lab work) into the curriculum. This helps students relate theoretical concepts to real-world applications, fostering deeper understanding and improving job readiness.

Increase Use of Student-Centric and ICT Methods: Encourage teachers to adopt diverse and interactive teaching methodologies beyond traditional lectures. This includes:

Implementing problem-solving and participative learning techniques (like group discussions, flipped classrooms).

Integrating Information and Communication Technology (ICT) tools such as multimedia, simulations, or educational apps (e.g., Google Classroom) to make lessons more engaging and visually effective.

Strengthen Mentoring and Feedback Mechanisms: Establish a more robust system for

teachers to identify individual student strengths and weaknesses. This should involve:

Providing regular, constructive feedback on assignments and tests.

Holding one-on-one or small-group mentoring sessions to address academic challenges and guide students' cognitive and career growth.

Good college And good teachers

1. Focus on skills
2. Technology use
3. Infrastructure

1. Intractive methods
2. Technology aces
3. Practical experience

Teachers should take test also in classes

Computer are not working properly

No placement

No smart class

No rules and regulations

Bad teachers

Good teacher or Good environment

1. Focus on skills
2. technology use
3. Infrastructure

.extra curricular activities

.Practical learning with thretical

Our teacher teach us very well and treat us very well and they help us a lot in our studies

Awesome

Fairly with all students

Behave same to all students

Nothing

I love studying here at "sikh national college" all of our teachers are very skilled and they always help us in different ways weither it is study related or not.

Please improve strength your teachers.

Please involved in extra programs in commerce department.

- 1)Focus on skill
- 2) technology
- 3) Infrastructure

- 1) teachers should include more real life examples.
- 2) teacher should give more time for solving doubts.
- 3)more seminars should be arranged to improve learning .
